Playwright Workshop

2 - Basics

Basic Rules in E2E Testing

- Let your test fail
- Use resilient selectors
 - data-*
 - text
 - role
- Multiple Matchers are allowed
- Stay with locator, not do direct fetching

test: useful methods

- **test.describe**
 - Suite: Defines a collection of tests
 - Can apply generic commands on test cases
- **test.only**
 - Runs only this test (relative to the suite)
- **test.skip**
 - Doesn't run this test
- **beforeEach, beforeAll**
 - setup Code
- **test.use**
 - override some configuration values

Playwright's workhorse: `page.locator`

- Returns a promise of a DOM query
- Chainable for actions
- Argument for assertions (`expect`)
- Different selectors (not just CSS)
 - Text selectors
 - Data-testid
 - Location-based
 - XPath
 - React/Vue experimental
- Nestable
- Shadow DOM "piercing"

Text selectors

- `await page.locator("text=Welcome to Eternal").waitFor(); // partial match`
- `await page.locator("text='Welcome to Eternal']").waitFor(); // exact match`
- `await page.locator("'Welcome to Eternal']").waitFor(); // exact match`
- `await page.locator("*", { hasText: "Welcome to Eternal" }).waitFor(); // fails on strict mode`
- `await page.locator("h2", { hasText: "Welcome to Eternal" }).waitFor(); // right approach`
- `await page.locator("h2:has-text('Welcome to Eternal')").waitFor(); // 👍`
- `await page.locator(":has-text('Welcome to Eternal')").waitFor(); // 👎`

Selectors via data-testid

```
await page.locator("data-testid=greeting").waitFor();
```

```
await page.locator("[data-testid=greeting]").waitFor();
```

```
await page.locator("css=[data-testid=greeting]").waitFor();
```

```
await page.getByTestId("greeting").waitFor();
```

Engines, combinations & nested selection

```
page.locator("data-testid=holiday-card");
```

Vienna / Wien

Dive into the capital of the Habsburg empire

ON SALE

INSIDE KNOWLEDGE

Relative Navigation: Direct Child

`data-testid=reference >> >div`

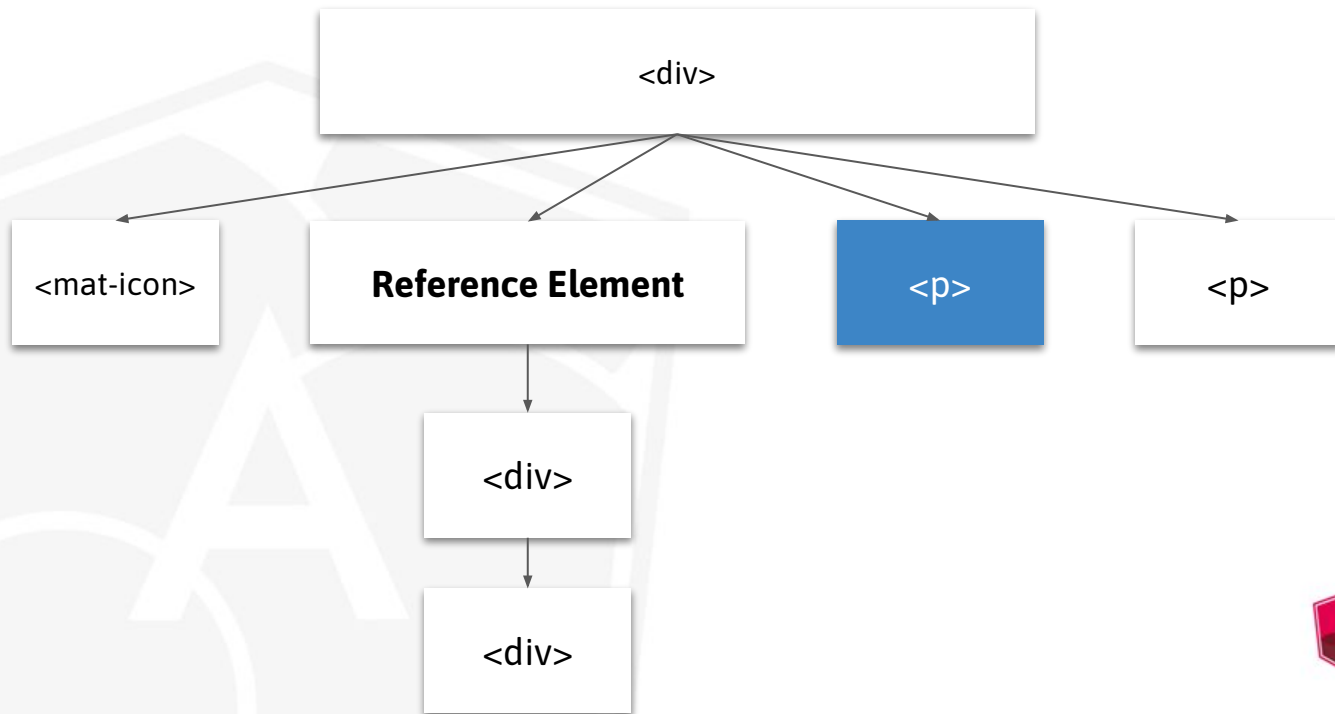

Relative Navigation: Parent

`data-testid=reference >> ..`

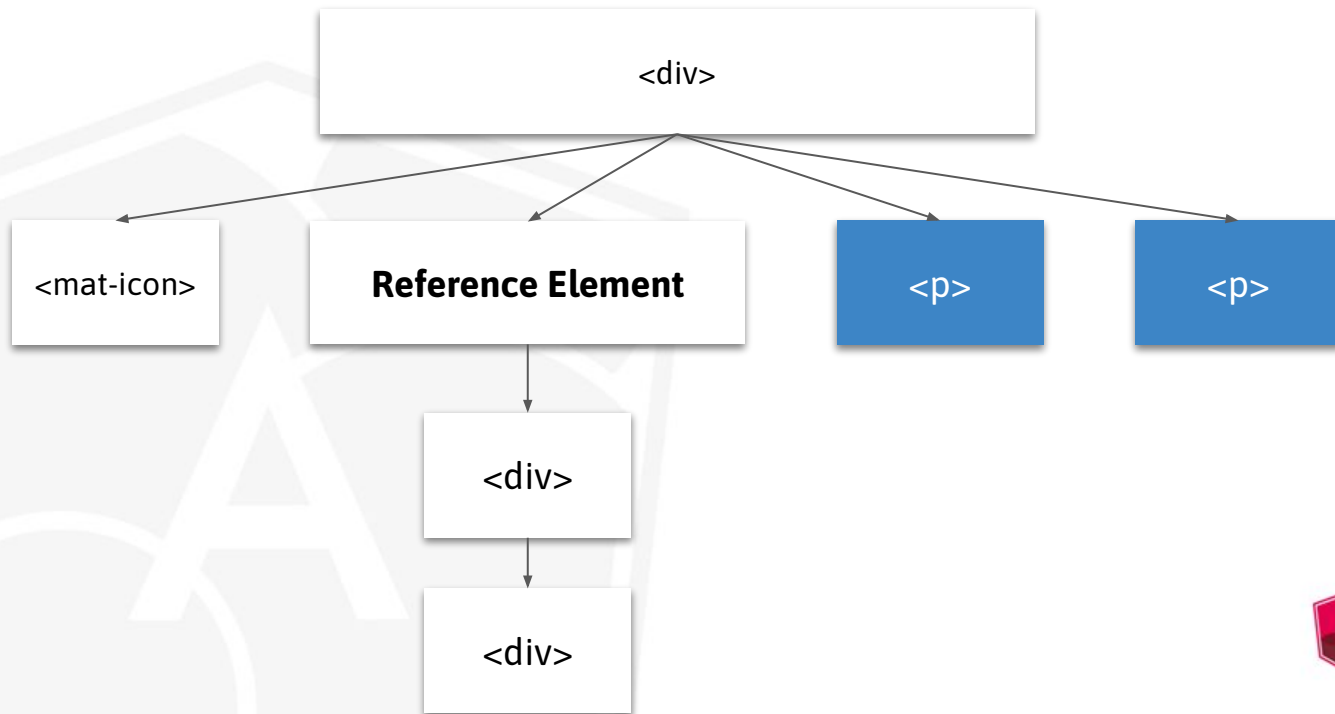

Relative Navigation: Adjacent (Right) Sibling

`[data-testid=reference] + p`

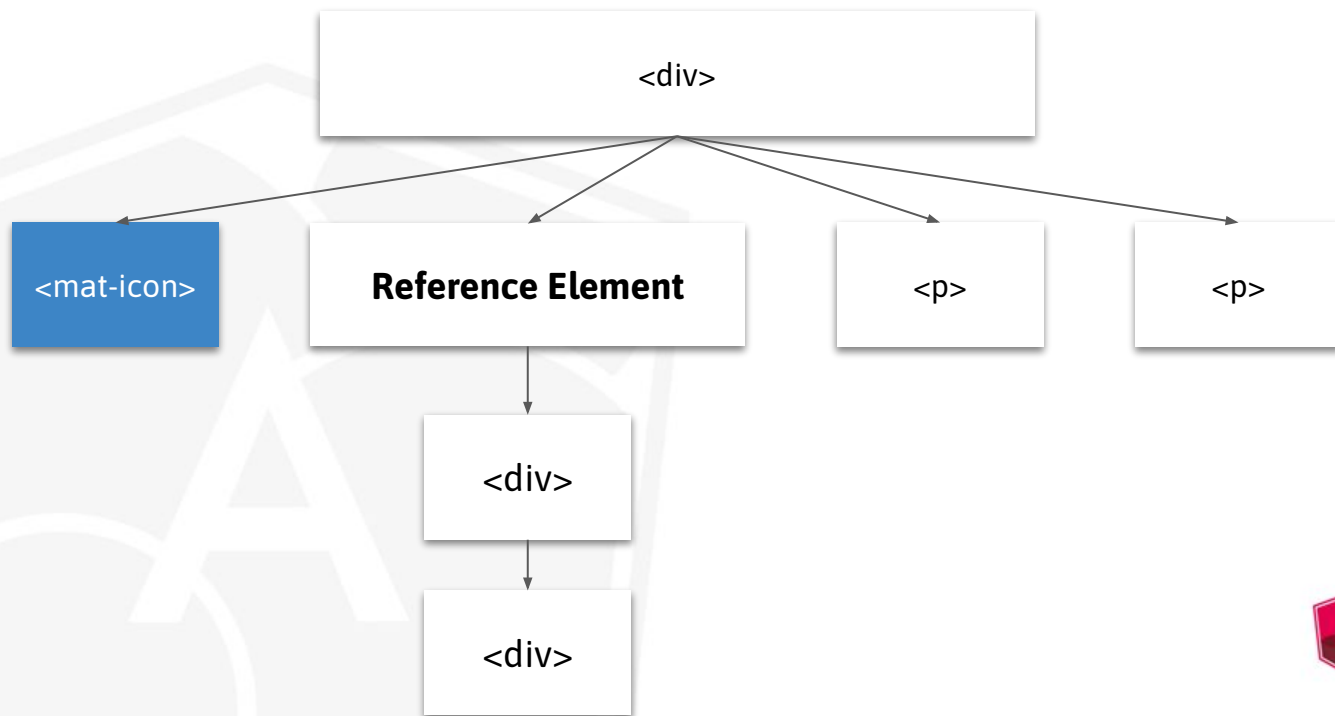

Relative Navigation: Sibling

`[data-testid=reference] ~ p`

Relative Navigation: Preceding Sibling

`data-testid=reference >> .. > mat-icon`

Selector Strategies

DOM-Based

- id Attribute
 - Must be unique
 - Browser-internal meaning
 - Consensus not to use it
- CSS Classes
 - Should be used for Layout
 - Don't deal with functionality
- Text
 - `page.locator(text='')`
 - Better to go with User-Facing Selectors
- data-testid
 - Best Practices
 - Recommended by Cypress

User-Facing

- Use text and/or roles
- Includes partially a11y
- "Testing Library Style"
 - No dependencies in Playwright
- Careful when text changes often
 - Fallback to data-testid

User-Facing Selectors

1. `page.getByRole`
2. `page.getByLabel`
3. `page.getByPlaceholder`
4. `page.getByText`
5. `page.getByAltText`
6. `page.getByTitle`
7. `page.getByTestId`

A11y Tooling

Unforgettable Holidays

RootWebArea "Eternal" focusable: true

- link "Eternal Unforgettable Holidays" focusable: true
 - heading "Eternal Unforgettable Holidays"
- paragraph ""
- button "Sign Out" focusable: true
- list ""
- generic "Vienna / Wien"
- generic "London"
- generic "Detroit"
- generic "Reykjavík"
- generic "Copenhagen / København"
- generic "Shanghai / 上海市"
- generic "Florence/ Firenze"
- generic "Granada"
- generic "Lübeck"

group "grammarty-integration" focusable: true

- StaticText "{"mode":"full","isActive":true,"isUserDisabled":false}"

Styles

Computed

Layout

Event Listeners

DOM Breakpoints

Filter

:hov .cls +

No matching selector or style

Examples

- `page.getByRole('link', { name: 'Holidays', exact: true })`
`.click();`
- `page.getByRole('button', { name: /Save/ })`
`.click();`
- `page.getByLabel(/Firenze/i);`
- `page.getByLabel(/Latitia/)`
`.getByRole('link', { name: 'Edit Customer', exact: true });`

Layout-specific tests

```
test("layout selectors", async ({ page }) => {  
  await expect(  
    page.locator("p:right-of(:has-text('Logout'))")  
  ).not.toBeVisible();  
  await expect(  
    page.locator("p:left-of(:has-text('Logout'))")  
  ).not.toBeVisible();  
  
  await expect(page.locator("p:below(:has-text('Logout'))")).toContainText(  
    "Welcome"  
  );  
});
```

Actions

- click
- fill
- waitFor
 - can be used instead of matcher
- first
 - Required for strict mode

Actionability built-in

- Based on action, Playwright runs checks before the action
- Checks
 - Attached
 - Visible
 - Stable
 - Receive Events (no overlay)
 - Enabled
 - Editable

Assertions

```
await expect([Locator]).[matcher]
```

ANGULAR
ARCHITECTS
INSIDE KNOWLEDGE

Assertions 1/2

- Assertions are build-in (Part of Playwright)
- Apply matchers to element
 - Always use locator
 - Don't forget about the await
- Verify that element(s) can be found
 - use `waitFor()` instead expect

Assertions 2/2 - Common Matchers

- `toBeVisible`
- `toHaveCount`
- `toHaveText`
- `toContainText`
- `not.[otherMatcher]`
